Key Personnel:

Mike McKinney, Senior Sales Manager, Marking and
Coding Group

Jim Clem, Sales Engineer

Christian Krzykwa, Associate Product Manager,
Marking and Coding

Garan Myers, Global Business Strategy

Hitachi Continuous Inkjet Printers have set the standard in reliable, efficient, and user-friendly product coding and marking solutions for more than 35 years. Reliable, Efficient, Easy to Use.

UX-Series

The Hitachi UX Series is the pinnacle of printing thanks to precision engineering and time-tested quality components. Innovations you will come to love include an intuitive 10.4inch touchscreen, an ultra-reliable, individually replaceable diaphragm pump, mess-free, mistake-proof fluid refills, accurate, dedicated viscometer, and an IP-65 rating (perfect for wash-down environments).

Twin Nozzle:

The UX twin print head now has the capability of producing 8 lines of text by combining two individual nozzles into one, compact design. In addition, by utilizing Hitachi's first on the market "interlaced" print control technique, multiple line messages are printed clearly and legibly, further reducing coding errors due to misprint.

Specialty:

Specialty printers are useful for a range of printing applications. These inkjet printers feature high-tech one-touch menu selection, onscreen troubleshooting, and flexible umbilical design.

Laser

Hitachi Lasers are designed with longevity, reliability, and efficiency built in. Like all other Hitachi products, Hitachi lasers are built with high quality, expertly engineered components that set the benchmark to which other products on the market are compared. Hitachi Lasers require little preventative maintenance, can accelerate production, and run cooler, longer.

SHOWCASE 2018 | **PACKAGING WORLD** | SHOWCASE 2018

HITACHI

Inspire the Next

TOUGH ENVIRONMENT?

CHALLENGE ACCEPTED.

THE RELIABLE AND EFFICIENT UX SERIES FROM HITACHI.

Hitachi's UX Series continuous inkjet printers represent the pinnacle of innovation in marking and coding technology, all while showcasing Hitachi's reputation for Reliability, Efficiency, and Ease of Use.

The UX Dynamic model printer is IP-65 rated, meaning it can be integrated into a variety of production environments without worry or modification to current production processes such as wash-down procedures.

Hitachi UX Series printers can operate in High and Low temperature environments as well as dusty environments, allowing them to be placed close to the action.
